PROFILE

I am passionate about software development and network management. I am eager to deepen my knowledge in computer science and contribute to your company.

SKILLS

Languages: Java, VueJs, Ruby, SQL, Python, Golang, JavaScript, HTML, C++, TypeScript.

Tools: Azure, Docker, Kubernetes, Terraform, Ansible, UML, Design Patterns, Puppet.

EDUCATION

- 09/20 - 08/23 Telecommunications Engineering Degree INSA LYON**
- Studies in network design, various protocols, signal analysis, and distributed systems
 - Projects in automation, concurrent programming, data analysis, security, and network performance optimization
 - Proficiency in MATLAB, Simulink, ns, GNS3, mastering TCP/IP and MAC layers, RPC, cryptography
- 08/22 - 01/23 Exchange Semester Abroad New Jersey Institute of Technology**
- Projects in cloud computing, network security, and machine learning for data analysis, transfer, and prediction
 - Enhanced knowledge in emerging technologies and project management methodologies
- 09/18 - 07/20 Computer Science DUT Université Sorbonne Paris Nord**
- Learning various programming languages and project management skills

PROFESSIONAL EXPERIENCE

- 02/23 - 05/23 DevOps Engineer / Business Engineer AVISTO**
- Achieved Azure Fundamentals certification (AZ900)
 - Implemented a GitLab on bare-metal on a Kubernetes cluster using Terraform, Ansible, Puppet, and Cri-O
 - Business development: recruiting candidates and client prospecting
- 04/22 - 08/22 Fullstack Developer Groupe ENVIE Rhône-Alpes**
- Developed a business application in Ruby On Rails (5.2) used for waste collection, processing, weighing, and storage linked with TrackDechets API
 - Wrote a specification document: gathering, analyzing, and prioritizing requirements
 - Improved, cleaned, and documented existing code and database
- 03/20 - 05/20 Web Developer Université Sorbonne Paris Nord**
- Supplied an online museum with Covid-19-related data
 - Created an application on NextCloud that analyzes images via AWS Rekognition
 - Supervised by a research professor and rewarded by the university foundation

PROJECTS

- Java Development of an RPC architecture github/rpc**
- Client-server architecture based on Remote Procedure Calls
 - Use of reflection to handle all parameter and function types
- C TCP Over UDP github/prs**
- Implementation of the TCP protocol over a UDP connection
 - Performance measurement and optimization
- VueJs, Postman Web platform for music playlists github/pweb**
- Use of VueJs and music analysis via Matlab
 - Responsible for site planning, wireframes, and server requests

LANGUAGES

French - Native, **English** - Fluent (TOEIC: 955), **Spanish** - Intermediate (B1)
